Waxing Recommendations

- We regret that we cannot perform waxing services on clients who are taking Accutane, Retin-A or antibiotics, due to the sensitivity these products cause to the skin.
- Hair growth must be approximately 1/8" in length or 3-4 weeks of hair growth to receive waxing services.
- After waxing, please allow 24 hours before sun-bathing or using a tanning bed. Newly waxed skin is more sensitive to the sun and will burn easily.
- If you are planning a vacation to a sun destination or preparing for a special occasion, we recommend that you schedule your waxing services 3-5 days before your departure or event.
- When receiving a bikini wax, please wear your bikini bottoms.

microdermabrasion

Microdermabrasion is the most natural way to safely exfoliate the skin without using harsh chemicals or lasers. This is the most advanced non-surgical treatment for skin rejuvenation.
